THE REDCLIFF REVIEW, THURSDAY, NOV. 26th, 1930

Number 14

## Conference Created Interest in Trade

Tariff Preference to be Continued 3 Years.

The Imperial Conference at London has concluded its six weeks meeting with three tangible results.

It has created a new and more personal interest in trade development within the Empire. It has in this respect, inserted the weeds of careful thought into minds which heretofore were absolutely closed to consideration of tariffs. Even the Labor Government of Britain, with Snowden, Graham, and Alexander — unwavering free traders of the period — has been to the extent of pledging that such tariff preferences as are now given the Dominion by Britain will continue for at least three years.

These preferences are not many but they are of some importance to Canadian industry and it was only prior to the meeting of the conference that announcement was made they would be permitted to lapse in the immediate future. The change of the attitude of the British Government is not so much a concession to Dominion representations as it is a recognition of an important and growing doubt in the mind of the British voter as to the selfish wisdom of standing by free trade while all the rest of the world has turned to higher protection. It is this growing doubt which forms perhaps from Canada's viewpoint, the most hopeful development of the conference.

Mr. Bennett was criticised in some quarters for the extreme candor with which he advanced Canada's position. It was probably the only method by which his side of the case could be fairly presented to the British people. Soft-pedaling diplomatic language would never have reached beyond the conference room and it has been abundantly proved that he could expect nothing from the present British Government except what public opinion compelled it to give in the way of preferences. It was to the public he spoke when with unprecedented candor he voiced his views as to the methods best calculated to stimulate Empire development. Because of his frankness he has been accused of interfering in British domestic politics. As a Canadian and none the less a Britanna he would have failed in his duty to both Canada and Empire had he hesitated to expose the present drift towards economic disintegration and to present his remedy if he had one.

It is a singular feature of the conference that Australia, New Zealand and South Africa agreed with him as to the menace of present tendencies and expressed confidence in his remedy. In these circumstances it would be far more just to say that if British domestic politics were inaugurated into the conference it was by British politicians and not by Mr. Bennett.

Wheat took another tumble downward in the Winnipeg market last Tuesday. Loans ranged lower than 8 cents a bushel at one period, registering the lowest in the history of the Winnipeg exchange.

Don't Forget the Skating Rink Dance.

## Pioneer Passes Away In Hospital Friday

John Evans Succumbs After long Illness.

Although John Evans has not been enjoying the best of health for some time past the news of his death last Friday was a great surprise to the people of Redcliff.

Deceased had been ailing for some time but it was not thought his illness was of a serious nature until a few days before he was taken to the hospital where it was found his once robust constitution was undermined and complications had set in although everything possible was done to relieve him he rapidly sank and he passed away shortly after entering the hospital.

Deceased was a pioneer of Western Canada having come here in 1888 to work for Lord Brassey who at that time had large land holdings in Alberta and Saskatchewan.

Shortly after arriving in Alberta he homesteaded in the Seven Persons district and farmed there for several years. He came to Redcliff several years ago and has resided here ever since.

Deceased had no relatives in Canada. His wife, who remained in England, predeceased him a few years ago. A married daughter still resides in England. His remains were interred in Redcliff Cemetery on Saturday. R. M. Stewart conducting the burial services.

The card party held in the parish hall Wednesday evening was favorably patronized. Mrs. Simpson carried away the ladies' first prize for bridge and Mrs. Rose got the consolation. In what Mrs. Leppard got first prize. Mr. McDermott and Mrs. Ellis were tied for the consolation and Mrs. Ellis won out by the cut of the cards. The afternoon was pleasantly spent. Thanks to Mrs. Bahtangy and Mrs. Waloff who had charge of the program.

The young people of the Brethren Church are making arrangements for a box social which they will hold in the Church on Friday evening Nov. 12th. Watch for the bills.

## School News

At the fire drill held in the school on Tuesday afternoon the whole eight rooms were cleared of the building in 17 1/2 seconds. A special fire brigade has been organized among the high school boys whose duties consist of opening all doors, stopping fire ladders, and operating water hose. In case of a real fire they are trained to take charge of operations on such time as the town fire brigade would arrive.

The regular meeting of the High School Literary Society will be held in the high school room on Friday, Nov. 21st at 7 P. M. sharp. This will be the last meeting this year. The theme on the program included an oratorical competition and dramatization of Charles Dickens' "The Tale of Two Cities". The play features John Soukup as "Scrooge", and James Peterson as "The Ghost". Visitors are welcome.

Alberta Relief Plans Approved at Ottawa

\$2,667,556 to be Spent in Relief Employment.

Further plans for expenditure on public works for unemployment relief have been approved by Senator C. D. Robertson, Minister of Public Works, on Monday night brought before the Senate. The bill provides for an expenditure of \$11,000,000 under the Canadian Pacific and the \$11,766,498 by the Canadian National Railway. Monday night's vote provided for an expenditure of \$14,000,000 in Prince Edward Island; \$1,561,800 in Quebec; \$663,446 in Ontario; \$1,250 in Manitoba; \$2,100 in Saskatchewan, and \$2,667,556 in Alberta.

At the Monthly meeting of the local Legion held last Sunday it was decided to ask the withdrawal of a separate members from membership. This was done for the purpose of reviving the list. All whose names have been withdrawn will have the privilege of making new applications, forms for which may be obtained from the Steward of the Secretary.

## Local Citizen Loses Two Brothers in Week

Ray, L. M., Engineer Receives Sad News Here.

During the past week Rev. L. A. Zeigler of this town received the news that two of his brothers had died suddenly at their homes in South Bend, Indiana.

The younger brother, Granville, who was 47 years old, died of blood poisoning which developed from a flesh wound received in an auto accident. Concerning his death the South Bend News says:

"His death removes from the business life of the city one of its best known citizens. For a number of years he was one of the leaders here in the retail and wholesale lumber business."

The other brother, Joseph E. Zeigler, died at the home of his sister after a three weeks illness of pneumonia. Deceased was living a retired life. He was a veteran of the Spanish American war having served with the 1st Indiana Volunteer Infantry.

## Indian Rules Want Dominion Status

Debate to Appear Federalist's Committee.

The cries of the "red" tribe against the Indian treaty Monday brought the creation of a United States of India of all the British Colonies. A resolution of all tribes—the solution of the Indian problem recommended in the Simon Report—was a constantly recurring topic as presented by the conference proceedings. And after the conference proper adjourned, its business committee met and decided to recommend that when the present general discussion was concluded a federal relations committee should be established.

A start has been made to get the skating rink in shape for this winter. Several improvements have been made to the building and grounds and this morning the first application of water was turned on. Everything is now in readiness to start operations as soon as the weather will make it.

## Local Legion Attended Church Last Sunday

Spontaneous Turn Out of Members of Legion.

Members of the local Legion turned out in goodly numbers for their annual armistice service which was held in Gordon Memorial Church last Sunday evening.

After meeting at their club rooms they marched in a body to the Church where the pastor, Rev. R. E. Pow, welcomed them and gave an address very fitting for the occasion. Taking as his subject "The Will to Peace and Order," he spoke of the many opportunities open for the individual, communities, organized and nations to help bring about the peace and good will for which all thinking people are now striving.

Special reference was made to the great debt all living to day owed to those who had made such great sacrifices during the years prior to the occasion which we were now commemorating. Under the heading the speaker drew attention to the 154 names of men from this town and district who had made the supreme sacrifice and which were inscribed on the honor roll of Gordon Memorial.

In closing Mr. Pow referred to the spirit of "Can and Will" which predominated during the great struggle of 1917-18 and said that the same spirit was just as necessary and could produce just as satisfactory results in times of peace as in war. He also made a plan for the support of all organization: community, National and International, which had for their object the bringing about of peace and order through throughout the world.

During the evening the choir rendered special music and Miss Martha Bahner recited "In Praise of the Field." The service closed the National Anthem.

Although acres of potatoes were frozen in the ground this fall on the prairies the total crop for the entire Dominion will be 1,000,000 bushels—greater than last year.

## Two Bodies Ask For Dollar Wheat

Suggest Dominion Government Handle Wheat.

At the convention of Municipal districts held in Calgary this week a resolution was introduced requesting the Dominion Government to establish a wheat Board and purchase all wheat from the Canadian farmers at \$1.00 per bushel at the elevators nearest to the farmer and sell it at the market price, and that any deficiency be covered by increased income tax or by any other source of taxation.

About the same time a similar move was advocated by G. R. Williams and E. Spence, the Saskatchewan United Farmers, while addressing the convention of the United Farmers of Manitoba in Winnipeg.

Capt. Eddie Collier, Misses Colman and Mrs. Spence, world's champion Philadelphia Athletics, and Spence, world's champion player of former years, were in Redcliff last November in the New Brunswick Province, England, when they were shooting deer, moose and bear and also added wild game and trout to their bag by a visit to Redcliff on the Gulf of St. Lawrence coast. Prediction was the game place for their hunting trips.

The championship of the 11th Canadian warbling contest, just concluded at the Central Station in Ottawa, was won by a pair of white Indians entered by Richard Green of Farrington Park, Ontario. Richard, a son of a son of Rhode Island, had been in the contest was a Rhode Island bird. The last laying individual bird in the contest was a Rhode Island bird. "No. 136" entered by Dan Russell of New Brunswick, B.C. it made a score of 257.5 points for 249 eggs. The contest lasted an usual 32 weeks.

Some international army officers' teams will compete at the Royal Winter Fair in Toronto. The first will be held in Toronto, November 19-27. They will come from the United States, the Irish Free State, Hungary, Sweden, Germany and Italy. They will also be a Canadian team. Teams will consist of four men each who will enter the lists for the World Challenge Trophy.

## The Musical Crusaders at Work

Working by the latest latest received, countless thousands of Canadians are listening to the United States in every Sunday afternoon to hear the Musical Crusaders of the Canadian Pacific Steamship Company in their radio program heard on the Empress of Australia's radio the world cruise. The above illustration shows the Crusaders at work under the leadership of Alfred Heather. They are in the newly fitted out studio CPMY at the Royal York Hotel, Toronto. These studios are among the most in North America being equipped with the very latest devices developed for perfect broadcasting. There are two of these studios in the Empire and the first ever to broadcast throughout the length and breadth of Canada over the Canadian Pacific Railway. Company's telegraph wire and chain of broadcasting stations.

## Here and There

(642)  
"The Canadian Government" is co-operating with ranches and exporters in their efforts to secure a market in Great Britain for Canadian cattle," said Hon. Robert Watt, Minister of Agriculture, who visited Montreal recently to inspect an experimental shipment of western stores at the stockyards in that city. The cattle, comprising 416 head of shorthorns, Herefords, Angus and purebred sters, were brought to Montreal on Canadian Pacific Railway for shipment to Manchester, England.

Analysing the causes of business depression in Canada, E. W. Beatty, chairman and president of the Canadian Pacific Railway, in a speech before the American Institute of Steel Construction, recently held in Montreal, suggested that cancellation of foreign debts of the United States would cure present world conditions and benefit the country that exported them. "It is not surprising," said Mr. Beatty, "that your men of vision have reached the conclusion that if they the war debt were removed, industry would be stimulated, trade would expand, and prosperity would return, and out of the revivification of the world conditions would inevitably come great benefit to the United States."

A forty-mile ski marathon from Lake Louise to Banff will be one of the big features of the Banff Winter Carnival which will open February 1st next. The run will cross turbulent mountain streams and will follow ascending ridges, ascending ridges of great height. "No small travelling in the world," is the way ski-ing experts who have planned it, describe the event.

Fur farming in Canada is now established as a leading industry. The latest available figures show that the industry today represents a capital value of \$22,980,417, of which \$16,000,855 is invested in fur-bearing animals. Prince Edward Island is the leader in the industry, with Ontario and Quebec not far behind. Ten years ago total value of fur-bearing animals on fur farms in Canada was placed at \$1,725,265.

Shewing of the Canadian Pacific Railway Company for the month of September, in which an increase of \$1,271,015 was shown in net earnings over the total for September of last year, in the face of an actual decrease in gross earnings, is a tribute to management's ability to adapt itself to unfavorable conditions according to a financial authority of Montreal. The shewing itself is not an indication of improved business, for gross earnings were only \$19,192,525 as against \$19,217,000 one year ago, a decline of \$128,491, but it is a favorable development for the company itself. What was done was to cut down operating expenses from \$14,540,687, shown in September one year ago, to \$12,910,060 for September, 1930. Some indication of what retrenchment in overhead costs could accomplish was given in the August figures when starting out with a decline in gross earnings of \$5,185,527, the company was able to show a net profit increase in net of \$288,575 over the corresponding period of last year. The result for September is even better than that.

Traveling of the memoirs to Uelva Curman, noted Canadian poet, took place at Fredericton recently and was broadcast all over the Dominion by Canadian Pacific radio network. Sir George Foster, well known Canadian statesman, spoke, expressing the sentiments of all Canadians in regretting the loss of the great national bard.

A French-Canadian wedding of a hundred years ago was one of the high lights of Quebec's Old Port. Dance, Folk Song and Handicrafts Festival which was given at the Chateau Frontenac in that city October 16th. Dances of Old and New France and of the Metis from the prairie provinces were among the other features of the festival which was conceded to have been the most successful of the many produced under the auspices of the Canadian Pacific Railway.

The Nova Scotia apple crop from the Annapolis Valley is now valued at \$2,000,000 and the significance of this figure will be realized when it is recalled that the return from last year's crop was approximately \$1,000,000. Growers affirm there never was a better year in the history of the industry than the present.

In 1930 there were 11,860 acres under tobacco in Canada which yielded 11,347,000 lbs. Preliminary estimates for 1931 indicate a yield of over 40,000 acres and a production of around 35,000,000 pounds. The greatest increase is in Ontario which grew 10 per cent. of the crop in 1930 and 75 per cent. this year.

## Here and There

(423)  
"Say it with apples," Canadian Pacific Express Company appeals for the sending of gifts by Canadians to friends in Great Britain and Europe, in being extensive from Christmas, and New Year presents to gifts sent at all times of the year. With the present bumper apple crop of Canada, the fruit can be bought at a reasonable price and its quality is of the highest. If sent overseas before the close of navigation on the 15th, Lawrence coast will be considerably reduced.

Over 300 officers and men of the 4th Canadian Mounted Rifles first mounted regiment, formed in Toronto at the outbreak of the Great War, is holding its first reunion, since the war at the Royal York Hotel, Toronto, November 26 and 27. The unit is proud of the fact that it still has in its ranks T. Thomas of Toronto, youngest Victoria Cross holder in Canada who captured an enemy machine gun unit singlehanded at Passchendaele.

An apple tree, over a hundred years old, remarkable for its symmetry and having this year produced 22 barrels of Canada Pacific apples is situated much prized in the orchard of Dwyer Martin, Lacombe, Kings' County, Alberta. Mr. Martin's apple tree from the same tree 34 years ago and it was then a fully grown tree. Today he believes it to be well over the century mark.

The arrangement existing between the Canadian Pacific Railway and the Government of Nova Scotia, with regard to local law intervention which has proved mutually satisfactory, will be confirmed for the coming year, is the recent announcement of H. H. Bower, secretary to Premier Riddell.

Superior grazing conditions in British Columbia are given as the reason for a shipment of 5000 head of Hamilton ewes and rams from Montana early made to the Vancouver Live Stock Exchange for distribution to sheep raisers in the Kootenay and Cariboo districts of British Columbia.

The farm of George Elbert of Westcliffe had won the trophy recently offered by the Edmonton Board of Trade for the best field of wheat in the southern half of the province of Alberta as well as the cup awarded by the Alberta Government for the best farm in Alberta, has yielded 16 bushels to the acre on a 10-acre field and sowed No. 1 hard. Elbert is another farmer who came to Canada without capital and has made a striking success.

The British Family Re-Union Association has been created by the Canadian Pacific Department of Colonization and Development, backed by industrial organizations, groups and individuals to promote increased British settlement in Canada. It will particularly benefit heads of families in Canada desiring to have their wives and families rejoin them in the Dominion, and others established on this side wishing to have relatives or friends overseas to emigrate to the Dominion for permanent residence.

## Mixed Farming

Arguments Advanced in Favor of Mixed Farming Are Convincing

The crisis in wheat farming in Western Canada is having no good effect, at least it is causing those interested to take stock of the situation and devise appropriate remedies. If year after year abundant crops were harvested, and no difficulties were encountered in marketing them at profitable prices, the result would inevitably be that, sooner or later, the soil would become exhausted and the result would eventually mean only one thing—the death of the goose that lays the golden eggs. The suggested expedient of cheapening the cost of production through mechanization of farm work does not prove effective as a temporary remedy. The Calgary Herald, which ought to make helpful suggestions, finds the solution of the problem in mixed farming, which would result, it says, as it has done in Europe, "in increasing the fertility of the soil, preventing soil drifting, and a natural reduction of the volume of wheat grown in competition with the Argentine Republic, Australia, India, the bonused wheats of Germany and Canada, and later an ever-increasing wheat yield from a mechanized Canada."

It is pointed out that at present Canada imports large quantities of butter and eggs, lamb from New Zealand, and a certain amount of bacon. There was a time when Canadian butter and cheese sold at a favorable competition on the London market with the Danish product, but at the present day such products are conspicuous by their absence. "With the abrogation of the Australian and New Zealand trade preferences, in favor of butter importations from those countries, there is no reason why butter production in this country should not become an important part of mixed farming activities. In short, the arguments in favor of mixed farming on a much more extended scale than at present practiced are so convincing that the plea of the Calgary newspaper is well founded. It is deserving of very careful consideration."

## Marketing Poultry

Market During the Balance Of the Year Will Be Restricted

"The poultry market during the balance of the year is going to be a trying one, perhaps the most difficult through which the industry has passed in recent years," observed experts of the Poultry Marketing Service of the Dominion Department of Agriculture. Not only are storage stocks heavy and production fully up to normal, but the market in which dress poultry can be sold to advantage is materially restricted this year through the new United States tariff barrier. Producers are urged to pay particular attention to the proper fitting of poultry for market, and to the development of the type the consumer wants. Poultry should never be marketed without first having been properly finished through special feeding, and young stock should never be put into finishing pens until fully grown and properly matured.

## Secure Wheat Prices

Herman Trele, of Wembley, Alberta, former wheat and oats king, was first prize at the Regina Exhibition, for his exhibits of Marquis and Reward wheats. William Denbrough, of Laura, Saskatchewan, was second in the Marquis class, while E. Thompson, of Pailbow, Sask., came just behind Trele in the Reward class.

Little Doris: "Mummy, what is a Civil Service?"

## Sea Area With No Oxygen

Forms Effective Barrier To Wanderings Of Residents Of The Ocean

A place was found in the tropical waters of the Pacific Ocean, the last voyager of the oceanographic ship "Caravelle" where there is practically no oxygen. O. W. Torrance, navigator and executive officer of the ill-fated vessel, said in a radio address recently.

This discovery, Mr. Torrance said, was only one of a number of important scientific findings made on the final trip of the ship, which started in Washington, in May, 1929, and ended when she burned in the harbor of Ajit, Samoa, in November, 1929. During those 18 months more than 50,000 miles were travelled in the North Atlantic, and the North and South Pacific. Captain Torrance said, making a total of nearly 300,000 miles, equal to 14 times the circumference of the earth, in the 20 years' life of this floating laboratory.

The spot with no oxygen in the Pacific of such extent that scientists may well conclude that it is an effective barrier to the wanderings of ocean creatures which live in the water. Mr. Torrance said he also noted this precious gas of life, Mr. Torrance said. Beginning 300 feet below the water surface and extending downward for 1,000 feet, this water lies in a band one hundred or more miles wide and extends for great distance to the east and west. It was found during the regular soundings of the "Caravelle," when measuring the depth of the ocean and studying its life and content.

## Fix Soybean Value

Some 24 Factories Of Soybean Found Suitable For Cultivation In Canada

The commercial demand for soybean oil or meal from time to time will fix the value of the various varieties of soybean. This is the observation of the Chemist of the Dominion Department of Agriculture. The correlation between "oil" of the seed and protein he finds is remarkably constant; the varieties being high in "fat" being relatively lower in protein, and vice versa. This becomes a matter of importance in view of the fact that there are some twenty-four varieties of soybean which have been proven suitable for cultivation as a commercial crop in Canada. The commercial value of the soybean arises from the oil obtained by expression, and the use of the residue of the bean, which is rich in protein, in the form of meal or cake as a livestock food. Soybean oil is used in hair coloring, paint, soap manufacture, and the soybean is also an important constituent in many of the popular patent foods now appearing on the market—in addition, as a legume and forage crop it ranks among the best.

## Treaty Payments Made

Treaty payments have been completed on the Indian reserves throughout the west, said W. M. Graham, commissioner of Indian Affairs, a northern party which left in June on a ten-week trip to reach Indians in the far north, is expected back shortly. They will have travelled about 1,500 miles by canoe, starting from Big River in Northern Saskatchewan.

## Industrial Saskatoon

According to Roy Bowman, president of the Saskatchewan Board of Trade (writing in "The Hub"), there are a total of 197 industries in Saskatchewan, including 52 factories, 53 branch factories, and 66 distributing plants.

## Sketches Noted Surgeon

When the Tomato Feels the Need of Dressing Up It Is Almost Like Painting

When the tomato feels the need of dressing up it is almost like painting the ily to attempt to add anything to its glistening red jacket, speaking so brightly of ripeness within, but now comes enterprising farmers have organized a co-operative association to market their entire tomato crop under the New England quality products label, the fruit to be graded and sold in glass-paper covered bush boxes.

No doubt the "quality" tomatoes will fetch a higher price, just as scrubbed carrots and parsnips bring a better figure, although they all come out of the pot looking about the same as their more plebeian brothers, which the grocer delivers entrusted with the soil that gave them their succulence.

The man who first grew rhubarb is a fellow to give it a darker richer red, and then tied the stalks into neat bundles with a bright red ribbon, had in idea. So did the potato grower who selected the most robust of his product, scrubbed them clean and smoothed them with a brush, then wrapped them singly in glass paper and sold them at five cents each.

Most British nurses, F.R.C.P., F.R.C., noted British nurse, who is known throughout the British Isles and Europe as the "doyen" of Laryngology, as he appeared to A. F. Meera, talented French nurse of the Canadian Pacific line "Duchess of Bedford," upon which ship Sir St. Clair, together with the other members of the British Medical Association, travelled recently to Montreal, on his way to Winnipeg, where the joint convention of the British and Canadian Medical Association was held.

## The R-100 Buys the Best

Purchasing Agent Buys Best Government Brand Beef

"Everything counts with us, we have room for nothing but the best" was the comment of the purchasing officer of the big British Dingle B-100 when discussing with best grading officials of the Dominion Department of Agriculture the question of meat supplies for the return trip to Carleton Place. He expressed immediate appreciation of the opportunity in Canada to buy the best beef by government brand with its guarantee of real quality. When his trip to Canada ended and B-100 cast off her line for the flight home she carried on board a supply of choice "Red Brand" individual steaks sufficient for two meals for all on board. The government brand removes the element of guesswork as to quality entirely from the purchase of beef throughout Canada, and every household, by insisting on being supplied with Red or Blue brand beef can buy the best beef with the same assurance of quality as had the purchasing officer of B-100.

Better to be able to appreciate the things we cannot have than to have things which we are not able to appreciate.

Nearly 40,000 people in Switzerland now are employed in the watch and jewelry industry.

A business firm established 372 years ago is still flourishing at North Walsham, Norfolk, England.

The photograph reproduced above shows Viscount and Viscountess Dunsin, two distinguished visitors Canadian Bar Association. Lord Dunsin is senior Lord of Appeal in the Ordinary and Keeper of the Great Seal of the Principality of Scotland.

## Furnishing the Tomato

New England Co-operative Association Has a New Idea

When the tomato feels the need of dressing up it is almost like painting the ily to attempt to add anything to its glistening red jacket, speaking so brightly of ripeness within, but now comes enterprising farmers have organized a co-operative association to market their entire tomato crop under the New England quality products label, the fruit to be graded and sold in glass-paper covered bush boxes.

No doubt the "quality" tomatoes will fetch a higher price, just as scrubbed carrots and parsnips bring a better figure, although they all come out of the pot looking about the same as their more plebeian brothers, which the grocer delivers entrusted with the soil that gave them their succulence.

The man who first grew rhubarb is a fellow to give it a darker richer red, and then tied the stalks into neat bundles with a bright red ribbon, had in idea. So did the potato grower who selected the most robust of his product, scrubbed them clean and smoothed them with a brush, then wrapped them singly in glass paper and sold them at five cents each.

Most British nurses, F.R.C.P., F.R.C., noted British nurse, who is known throughout the British Isles and Europe as the "doyen" of Laryngology, as he appeared to A. F. Meera, talented French nurse of the Canadian Pacific line "Duchess of Bedford," upon which ship Sir St. Clair, together with the other members of the British Medical Association, travelled recently to Montreal, on his way to Winnipeg, where the joint convention of the British and Canadian Medical Association was held.

## The Bug Detectives

Continually On the Alert To Check Invasions Of Crop Thieves

Neither Scotland Yard nor the equally famous Burns Agency in the United States can boast more able detectives than the Entomologists and Botanists of the Dominion Department of Agriculture, whose lives and energies, not without risk to personal welfare, are devoted to the protection of sources of food supply. They are continually on the alert to check the invasions of crop thieves in the form of insects, bugs and germs of countless species. Their work involves the solution of mysteries as thrilling, and even more important to the welfare of the nation, as that of their police counterparts. Instead of bullets and guns these "bug" detectives deal with larvae, spores, and germs, infinitely more intricate and harder to deal with. And their work too, is never done; there is always some new problem of field or laboratory study just around the corner.

## Nothing To It

Eleanor Medill Patterson is editor of the Washington Herald. Most of her work is done in the home. Some one wrote to her and asked how she proposed to boss a room full of males. And she answered in her newspaper that she could remove no difficulties because "men always have been bossed by women, although most of the time they don't know it."

The Netherlands government has established a commission to study plans for aiding the farmer.

## Prince Had Narrow Escape

Related Story Of How Prince Of Wales Was Once Threatened By Madman

A story of how the Prince of Wales was stalked by a madman with a rifle, is now revealed. The episode, which, but for the prompt action of a detective might have resulted in a tragedy, occurred 10 years ago, but it is told for the first time by Sir John's Weekly in an Australian paper, and its truth is vouched by J. A. Fitch, a former acting premier of Queensland.

During the Prince's Australian tour in 1920, he went to Cochin Coochin to spend a quiet week-end and on the homestead of the late E. T. Bell, a Queensland squatter.

Accompanying him was a well-travelled little bodyguard of the Queensland police under Detective Michael O'Sullivan.

A shell-shocked ex-soldier, a man subject to fits of eccentricity and depression, lived near Mr. Bell's homestead. He had never shown any sign of violence and his significance was attached to the fact that he seemed to resent being kept in the background during the royal visit.

One afternoon, while the Prince and his Lady Lilibet were taking a quiet stroll in the grounds of the homestead, O'Sullivan saw the ex-soldier shadowing the Prince. The madman was holding a rifle and his eyes were along the sights.

O'Sullivan was alone had a second to decide on his line of action. Should he shout and warn the Prince and risk the madman firing or should he try to get the rifle away? He took the second course.

"Creeping up, the detective hurried to the madman, wrested the rifle from his hands and dragged him away. Unaware of his peril the Prince continued his stroll.

O'Sullivan reported the matter to Mr. Fitch, who considered it inadvisable to make the episode public on account of the sensation it would have caused.

It was not until the Prince was some 200 yards away from Australia that he was informed of his escape. In gratitude the Prince sent a detective an autographed letter and a telex net in pearls.

## Why Get Stung

Methods Of Removing Honey From The Hive

"Why get stung?" is the pertinent observation of C. B. Goodenough, Dominion Apiarist, discussing methods for the removal of honey from the hive. The bee does not work by the clock, nor does it cease work when its own food requirement is filled, and a good colony of bees will often store double the amount of honey required for its own use. This surplus is the result of the keenness of the bees, and as the Dominion Apiarist puts it, "their method of arguing the question is not only pointed, but painful to the person of the opposition." The old familiar method of settling the dispute has been to first get the bees with sulphur fumes, and then take all the honey in peace; but, like killing the goose that laid the golden egg, it destroyed much valuable property. A newer method is by the use of the "bee escape" to take the honey without the bees knowing anything about it, and without getting stung. Just how this is done is described in the Department Bulletin No. 33 issued by the Publications Branch of the Dominion Department of Agriculture.

## Canada's Wild Animal Life

Has a Capital Valued To Dominion Of One Billion Dollars

Canada's wild animal life has a capital valuation of one billion dollars, and means a yearly business turnover to the country of about \$40,000,000, Dr. H. P. Lewis, of the Department of the Interior, told delegates to the provincial-Dominion game conference at Ottawa. This valuation included the fur harvest, game-bird and their attendant effort upon the manufacturers of firearms and fishing tackle. In addition, railways, tourist camps, guides and the magazine publishers were affected by conservation and preservation of Canada's wild animal life, because a considerable revenue is derived from this source.

According to a new item, the ex-Kaiser thinks nothing of chopping wood all day. We don't think much of it ourselves.

Small birds "pick up" in spots when they start to fly more rapidly than large birds.

Poland is considering the establishment of a central land mortgage bank.

## The King And The State

Conception Of Kingship Something Peculiar To The English

The English conception of kingship is in fact something peculiar to the English, and perhaps also to the Scottish) mentally, declares Geoffrey Layman, an Englishman who explains why he believes it to be in the September number of Harper's Magazine. "When people of other races say that the English are in kings the conception of kingship which they have in mind is something quite other than the English concept. The English, greatly as they pride themselves on their intellectual achievements, are a people who feel rather than think. Their beliefs and their actions spring not so much (indeed hardly at all) from reason as from an inherited racial instinct which slowly adapts itself to the changing circumstances of their history, and the fundamental doctrine by which they guide their lives are derived not from any scientific teaching handed down from father to son, but from something, the fruit of experience and tradition rather than of reason, in that it is their race and from before their birth.

The King, then, to us is the State, the visible part of the State, and when we say that we 'believe in' kings, are saying, in truth, no more than we believe in the State. The King, then, we share with the vast majority of our fellow mortals that not ignore the State, in that any other nation in the world, of excluding the United States of America; and at no period of her history has the substitution of a republican for a monarchical form of government been less likely."

## Prince May Visit Canada

May Cross Dominion En Route To Buenos Ayres

The Prince of Wales may cross Canada en route to attend the British Empire Trade exhibition in Buenos Ayres in 1924, it was understood in London, England. It was considered probable that the prince would go down the west coast of South America, travelling through the Panama canal or across Canada. He would cross the Andes by railway after a sea trip to Valparaiso, Chile. The prince's itinerary is expected to be announced about September 1. It was stated that officials favor a British warship instead of an ocean liner for the prince's ocean travel.

## Unfavorable Trade Balance

Report Shows Heavy Decline For Past Year

For the 12-month period ending July 31, the Dominion's imports amounted to \$1,145,032,407, and her exports \$1,015,777,740, according to a report made public by the Dominion Bureau of Statistics.

This left an unfavorable trade balance—surplus of imports over exports of \$129,254,667. For the corresponding period of 1920, the favorable balance was \$89,942,011; for 1921, \$135,215,472, and for 1922, \$203,115,010.

Some of Heri's original apparatus, used in the discovery of radio waves, is preserved in the German museum at Munich.

The ultimate minimum of praise is contained in the expression made by a dealer when you're trying to trade in your old car.

The Balkans are like a checker-board; you never know which way a king is going to jump.

Henry Park once belonged to the Abbey of Westminster. It became Crown property in 1550.

"Go! to sleep!"

"Yes, I always go to bed before the first stroke of the month's creditors never think of looking there."—Hummel, Hamburg.

## Among Students

"Going to lecture?"

"Yes, I always go to lecture for the first stroke of the month's creditors never think of looking there."—Hummel, Hamburg.

### Here and There

(418) Radio came into play recently in maintaining the Royal Canadian Mounted Police tradition of "getting the most out of Mrs. Donald McIntosh," of Glasgow wrote C.P.R. inspectors in Montreal to help locate her son, Angus after months of silence. The railway through J.J. Smith, general manager eastern time, got in touch with J.W. Reading, superintendent commanding the Saskatchewan district of the C.P.R. who in turn applied to radio sources. Angus who was missing in St. Catharines, got the message from home and at once communicated with his mother.

George M. Inverarity and J.K. Christian, of Calgary, Manitoba, won the boys and girls winter club championship on Canadian Pacific Railway line in the province at the annual competition recently held at Manitoba Agricultural College. They won the Manitoba Cup for their club for the second time, gold medals for themselves and qualified for the trip to the Royal Winter Fair at Toronto this month as guests of the railway.

A novel form of entertainment is being offered at North Sydney, N.S., where passengers are being taken out on local sword-fishing crafts for which a small fee is charged. Many are availing themselves of this opportunity of seeing the huge fish harpooned from the deck of a boat. An instructive explains the method and in catching these monsters of the deep.

Partners from all parts of Canada will again be competitors in the International Livestock, Grain and Hay Show to be held at Chicago, November 20 to December 6. In the competitive class for hard spring wheat, wheat of which is acclaimed as the world's wheat king, Canada has won 16 times in the past 19 years and the province of Saskatchewan has won the crown on 11 occasions.

Have you secured your ticket for the Rink Dance.

An All-Weather Recreation NO rule checks fenced for Billiards. You can enjoy a game night as day in any weather, any time of the year, and never tire of this greatest clean pastime, especially when played on our modern Brunswick equipment.
